-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 recites the limitation "the signals" on the 2nd line. There is insufficient antecedent basis for this limitation in the claim. However, in light of the context of the claim, it is considered to refer back to "a signal" in claim 1 and will be treated as such for examining purposes.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakano et al (US 6,011,787).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the

Art Unit: 2634

inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Consider claim 1. Referring to Fig. 1, Nakano et al discloses a base station (1) having a plurality of sectors (Sector-1, Sector-2, Sector-3). Fig. 17 shows that the base comprises a "means for generating a signal" (191). Fig. 15 shows the signal is comprised of a plurality of frames. Referring to Fig. 24, Nakano et al further discloses a "means for transmitting the signal in each of the plurality of sectors" (15a, 15b, 15c) wherein frame transmission timings are different between the plurality of sectors. See delay circuits (14a-14c) and col. 16, lines 60-61.

Regarding claim 2 additionally calling for "transmitting the signals" by using a plurality of channels," it is seen in Fig. 24 of Nakano et al that the signal is transmitted by using a plurality of channels in that a plurality of RF amplifiers and antennas are used. Note different antennas and RF transmission systems for respective sectors.
